— SCHOOL DISTRICT —

Office of Special Education

Student Name:	School:
Teacher/Team:	Grade:
Parent/Guardian:	Date:

As a way to best serve your child, school personnel would like to complete a Functional Behavior Assessment (FBA). A FBA is the process of:

- Identifying behavior(s) that interfere with learning
- Identifying environmental factors which impact behavior(s) that interfere with learning
- Determining the cause of the behavior(s) that interfere with learning
- Developing a hypothesis of the function of the behavior(s) that are interfering with learning.

The purpose of a FBA is to gather relevant data to plan and determine the needs regarding a possible Behavior Intervention Plan (BIP). A FBA may include, but is not limited to, these direct and indirect methods:

- Structured interviews with school personnel and/or student
- Observations and data collection regarding student behavior

By completing this process, it will allow the school personnel to support your child within the school setting.

I give consent for a Functional Behavioral Assessment to be completed in regards to my child.

I do not give consent for a Functional Behavioral Assessment to be completed in regards to my child.
