

# 2012-2013 Goals & Priorities

## AiM—Achievement in Motion for Student Success System Plan

WHAT ACTIONS WILL WE TAKE?	WHAT WILL SUCCESS LOOK LIKE?
Implement a multi-year Mental Health and Addiction Strategy.	Progress is made during Year 1 (2012-2013) of a 3-year process, including the development of standardized processes and protocols to align with other initiatives related to mental health delivery.
Build knowledge of mental health awareness and literacy.	Supports to enhance mental health awareness and literacy for specific audiences are provided.
Explore existing evidence-based mental health programs for promotion, prevention and intervention.	Programs are selected and piloted for use at all schools. A suicide protocol is developed.
Review the process for students to access mental health supports within schools, and also services from community agencies/partners.	Roles and responsibilities for school board employees and community agencies/partners which provide mental health supports in schools are clearly defined.
Explore mental health supports for employees and families.	An inventory of supports is created. Connections to the Mental Health and Addiction Strategy are starting to be made.
